EDUCATION

Indira Gandhi Delhi Technical University (IGDTUW)

B.Tech in Computer Science Engineering (CSE-AI) GPA: 8.48/10.00

Specialisation in Artificial Intelligence, Machine Learning & Data Science

New Delhi, India

2024 – Present

SCHOLASTIC ACHIEVEMENTS

- Awarded Merit Scholarship **JSTSE (Junior Science Talent Search Examination)**, Govt of India in Y2021
- Secured **International Rank 24 (State Rank 2)** in **Mathematics Olympiad IOM (Silverzone)** : Y2020
- Secured **International Rank 70 (State Rank 34)** in **Mathematics Olympiad IMO (SOF)** : Y2022
- Secured **International Rank 87 (State Rank 5)** in **Science Olympiad IOS (Silverzone)** : Y2021

PUBLICATION

Code-Mix Sentiment Analysis on Hinglish Tweets

Accepted at **NLPiR 2025**, Japan

- Performed sentiment analysis on **Hindi-English** code-mixed text, handling informal and ambiguous language
- Built a unified **Hinglish-24k dataset** and benchmarked deep models against **classical NLP baselines**
- Evaluated **mBERT** vs. **TF-IDF** pipelines, demonstrating improved robustness on noisy, code-mixed inputs
- Addressed challenges such as **sarcasm detection**, **neutral-class ambiguity**, and inconsistent transliterations

PROFESSIONAL EXPERIENCE

AI-Powered Full-Stack Development Intern | IGDTUW

Jun '25 - Jul '25

- Built scalable **MERN** applications using TypeScript, JWT authentication, MVC architecture, and REST APIs
- Developed **AI-powered web apps** using **OpenAI** and **Hugging Face** APIs for user workflows
- Deployed production-ready services on **AWS (EC2, S3)** with automated CI/CD pipelines via GitHub Actions
- Optimized frontend performance with responsive UI, Zustand state management, and React Hook Form + Zod

AI Solutions Contributor Intern | GirlScript Summer of Code

Oct '24 - Jan '25

- Contributed to multiple **open-source projects** as part of a competitive national-level program
- Collaborated with **experienced mentors** to enhance **coding skills** and overall **project development**
- Gained hands-on experience in **real-world collaboration**, **debugging**, and effective **problem-solving**

MAJOR PROJECTS

IndianRoots.ai: AI-Powered Artisan E-Commerce Platform

Sep '25 – Nov '25

Generative AI Product | Google Gen AI Exchange Hackathon 2025

[GitHub](#)

- Advanced to the **Prototype Phase** as a **top-ranked global team** in the Google Gen AI Exchange Hackathon
- Built a **Gemini API-powered conversational agent** to auto-generate product descriptions and help buyers in real time
- Developed a scalable **full-stack marketplace** using **React.js** and **Node.js** with real-time search and order tracking
- Implemented role-based **authentication** with secure dashboards for artisans and buyers, ensuring access control

Plant Disease Image Classification using Deep Learning

Oct '25 – Nov '25

Deep Learning & Full-Stack ML Product | Course Project: Artificial Intelligence (Prof. Kiran Malik)

[GitHub](#)

- Built an **end-to-end deep learning pipeline**, integrating a trained CNN into a web app for real-time image inference
- Engineered a custom **10-layer CNN** using **TensorFlow** and **Keras** to classify plant diseases across **38 categories**
- Trained on the **New Plant Diseases Dataset (Augmented)** from Kaggle, achieving **93.78% validation accuracy**
- Deployed the model via a **Streamlit** interface, enabling image uploads and real-time prediction outputs

BetterX: Scalable AI-Driven Web Platform

Aug '25 – Nov '25

Full-Stack & Data Systems Product | CodeSlayer 2K25, NIT Delhi

[GitHub](#)

- **National Finalist**, ranking in the **Top 65 of 2,500+ teams (Top 2.5%)** at CodeSlayer 2K25
- Deployed a **scalable full-stack system** using **React**, **Tailwind**, **PostgreSQL**, and **MongoDB** with modular APIs
- Built **data-driven dashboards** for real-time user state tracking and longitudinal analytics over structured user events
- Implemented a rule-based **scheduling engine** with conflict resolution, transactional guarantees, and session confirmation

Database Management Systems

Aug '25 – Dec '25

Course Project | Instructor: Prof. Poonam Bansal

- Designed and implemented **relational schemas** in **MySQL** with constraints, indexing, and aggregate queries
- Built normalized multi-table schemas and executed **complex SQL joins** for structured analytical workloads
- Implemented **PL/SQL** procedures, triggers, cursors, and performed **NoSQL CRUD** using **MongoDB**

- Designed a **commerce-focused mobile UI** for a digital craft marketplace, modeling end-to-end flows in **Figma**
- Built structured **purchase and discovery workflows** covering browsing, custom orders, tutorials, and store discovery
- Prototyped **AI-assisted navigation** with real-time **order tracking** to improve task completion and usability

- Designed a modular **mobile UI** for personal tracking and habit workflows, emphasizing clarity and reuse in **Figma**
- Created **analytics-driven user flows** for journaling, dashboards, meditation workflows, and AI-assisted interactions
- Proposed **scalable UX modules** enabling feature extensibility, community interactions, and future product expansion

POSITIONS OF RESPONSIBILITY

- Improved chapter visibility using **engagement analytics** to optimize social media reach and campaign performance
- Designed **multimedia** content for **AWS** workshops using **Adobe Creative Suite**, increasing event participation
- Streamlined event promotions using lightweight **automation tools**, improving campaign efficiency and student turnout

- Created **technical blogs and tutorials** with **workshop material** on Microsoft tools and cloud platforms
- Supported **hands-on workshops and webinars**, mentoring peers and facilitating large-scale technical learning
- Applied Microsoft cloud tools and workflows to improve content quality, reuse, and distribution

- Designed **event creatives, banners, and posters** for workshops and hackathons using **Canva** tools
- Built **short-form media assets** (posts, reels) to strengthen community outreach and engagement efforts
- Collaborated with content and marketing teams to ensure **consistent branding** across technical initiatives

TECHNICAL SKILLS

Programming Languages	Python, C++, C, Java, R, JavaScript, TypeScript, SQL, Bash
ML, DL & GenAI	PyTorch, TensorFlow, scikit-learn, Hugging Face, OpenCV, spaCy, NLTK, Gemini API
Web & Backend	React.js, Node.js, Django, Flask, FastAPI, REST APIs, MongoDB, HTML, CSS
Data & Analytics	NumPy, Pandas, SciPy, Matplotlib, PySpark
Systems, Cloud & Tools	AWS, Docker, Linux, Git, CI/CD, Postman, VS Code, Figma, Overleaf, L ^A T _E X

MAJOR COURSES

Computer Science & Artificial Intelligence	Machine Learning, Data Science, Data Structures & Algorithms, Python Programming, Programming with R, Database Management Systems, Object-Oriented Programming, Cyber Security, Information Technology
Mathematics	Probability & Statistics, Applied Mathematics, Discrete Mathematics, Linear Algebra
Electronics	Basics of Electronics & Electrical Engineering, Applied Physics

EXTRACURRICULAR ACTIVITIES

- State-Level Finalist (VBYLD 2026)**: Advanced to Stage III of the Viksit Bharat Young Leaders Dialogue
- Supported the **Netra–Naari–Netritva Drone Initiative** through training sessions and a national project demonstration
- Completed a certified course in **Internet of Things (IoT)** by the Telecom Sector Skill Council
- Completed **DSA Bootcamp 3.0** in Java, covering core data structures and algorithms (CodeBenders)
- Participated in **Ideathon (InnoVortex 2.0)**; developed a working prototype in the healthcare domain
- Participated in **Ideathon (IDeaGen)**; developed a prototype focused on pottery and crafts digitization
- Attended the technical session “**Unleashing the Future of AI with AWS**” on cloud AI
- Attended **Pariksha Pe Charcha (PPC)** and had the opportunity to meet the Honourable Prime Minister of India
- Awarded by the **Embassy of the Republic of Korea** for the Korea–India Friendship Essay Competition (2021)
- Received a **Certificate of Recognition** for environmental awareness under “Train for Clean Air for Kids” by Eco Club
